EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronald Fish (Reg. No. 28843) on December 6, 2004.

The application has been amended as follows:

- Claim 1, line 13, deleted "if necessary".
- Claim 10, line 13, deleted "if necessary"
- Claim 11, line 10, deleted "if necessary"
- Claim 12, line 10, deleted "if necessary"
- Claim 16, line 11, deleted "if necessary"

Allowance

2. Claims 1-20 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is U.S. Patent No. 5386369 to Christiano. Christiano discloses a metering system that is in a hardware based dongle style meter that plugs into a port of the computer system on which the metered software is running, in software with the metering information being stored on the computer's non-volatile memory or even on a

remote location that is attached to the computer system via a network. Christiano taken either individually or in combination with other prior art of record fails to teach or suggest controlling said usage measuring server with said distillation program to retrieve at least the appropriate usage data for the time segment to be processed and retrieve the appropriate license terms and plug the data into the appropriate variables of the appropriate formulas of said distillation program and calculating the formulas to generate metrics for the time segment as recited in independent claims 1, 10-12 and 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- European Patent No. 0852349 to Barritz et al. discloses “a method and apparatus for collating, correlating and redistributing information about the use of proprietary products including copyrighted works and licensed software products, at various computer sites.”
- “Software Licensing Problems, Opportunities and a Process for Solution” by Mike Schelp discusses software licensing components including metrics. As stated in the article, “metrics and license periods from the basis of value while pricing and discounts create the degreee.”
